

## **What They're Saying ...**

### **California Clean Money Campaign**

*"The issue of non-profits that hide money is a crucial one that many in the public care deeply about. It's a particular concern when it comes to non-profits that use taxpayer funds like this."*

### **Howard Jarvis Taxpayers Association**

*"It is a violation of the public trust for a non-profit, taxpayer-supported fund to spend those taxpayer funds on statewide ballot measures. Taxpayers deserve to have their interests represented without their hard-earned dollars being used against them."*

### **California Professional Firefighters**

*"Every dollar that is spent by working people through their unions is fully reported and accounted for, whether it's for campaigns or their general fund. There's no reason why groups like the League of Cities should be able to hide from full disclosure of their campaign donations."*

### **California Building Trades Council**

*"There's really not an issue to debate here. It's about public disclosure and good governance."*

### **Partial endorsement list (as of 8-20-13)**
